

COLLECTION 2026

Materials *board*

Stone, metals, wood and fittings that we install in exceptional bathrooms and interiors, in Deauville, Honfleur, Villers-sur-Mer and throughout Calvados.

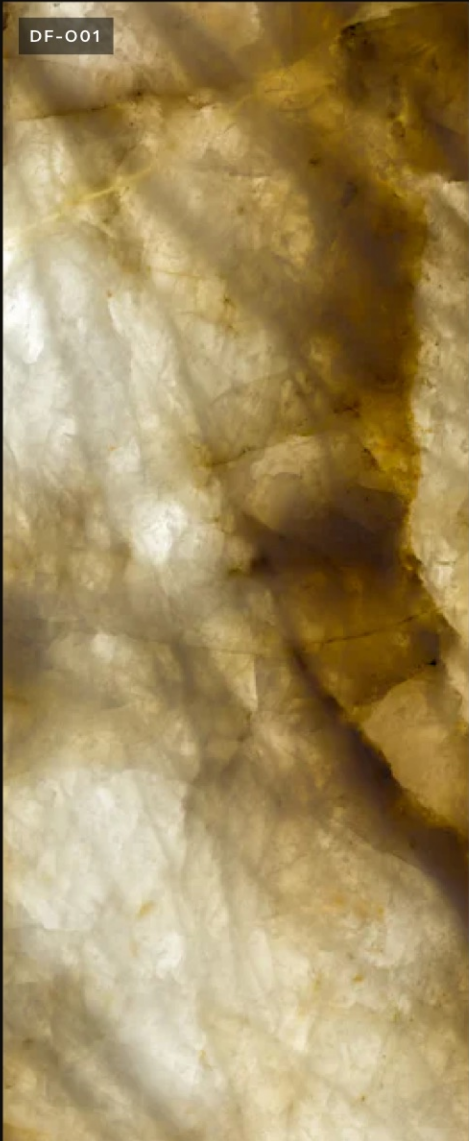

TRANSLUCENT STONES

Onyx, *the stone that lights up*

Backlit, onyx becomes a source of light: splashback, monolithic basin or a whole wall. We build in the LED lighting and the waterproofing behind the stone.

- Mirror polish
- Can be backlit
- Monolithic basin
- Splashback

Honey onyx
Polished · backlit · walls, basins

White onyx
Polished · vanity tops, splashbacks

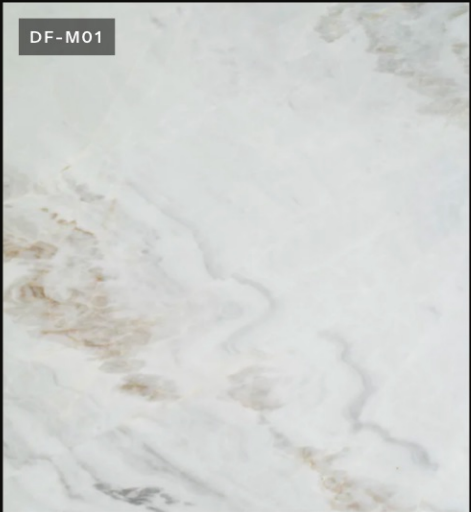

Banded onyx
Polished · signature pieces, niches

MARBLE & NATURAL STONE

Veins *that tell a story*

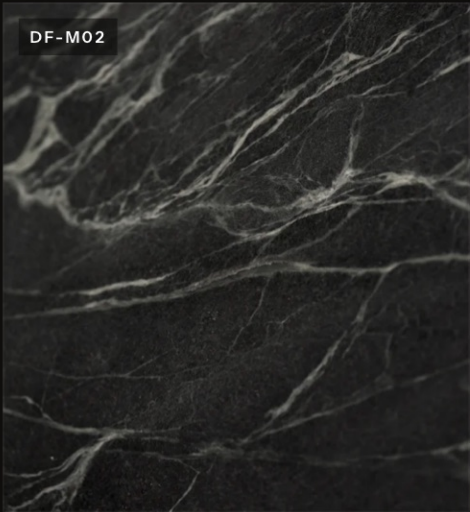

Large book-matched slabs, shower trays carved from the solid, made-to-measure tops. We choose the slabs with you and lay them with minimal joints.

- Polished
- Honed
- Book-matched
- Solid-stone shower tray

Calacatta oro

Polished · walls, tops, shower trays

Nero Marquina

Polished or honed · floors, basins

Verde Alpi

Polished · niches, vanity tops

Rosso Levanto

Polished · accent pieces

Travertine

Honed, filled · floors, walls

Terrazzo

Polished · floors, tops, basins

TAPS, ACCESSORIES, HARDWARE

Six finishes, *one common thread*

Taps, switches, handles, towel rails: we match every metal finish in a room for a coherent whole.

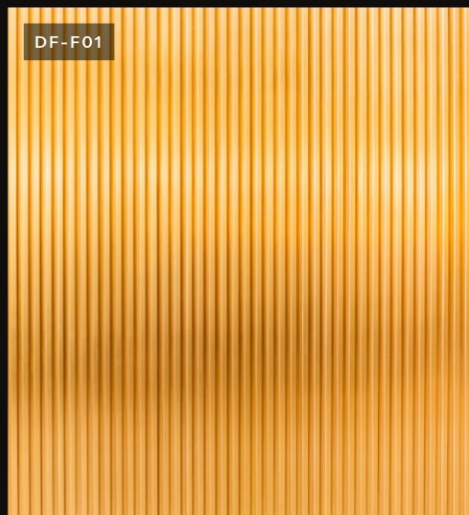

Solid brass

PVD

Brushed

Patinated

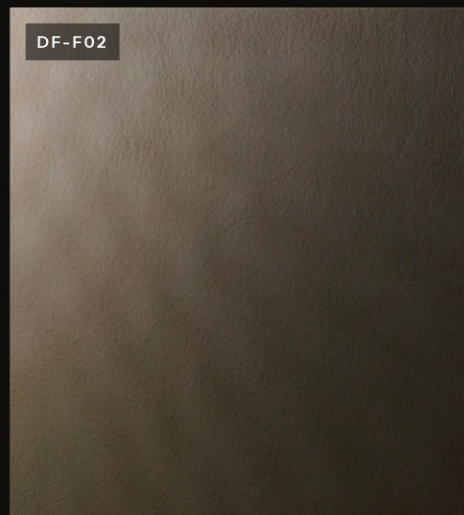

DF-F01

Brushed brass

PVD or solid · taps, handles

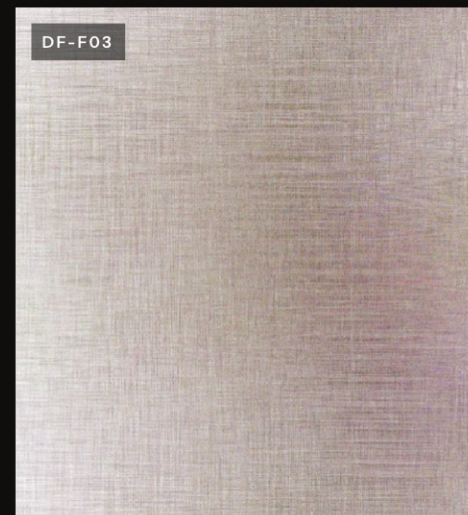

DF-F02

Patinated bronze

Patinated · fine hardware

DF-F03

Brushed nickel

PVD · taps, switches

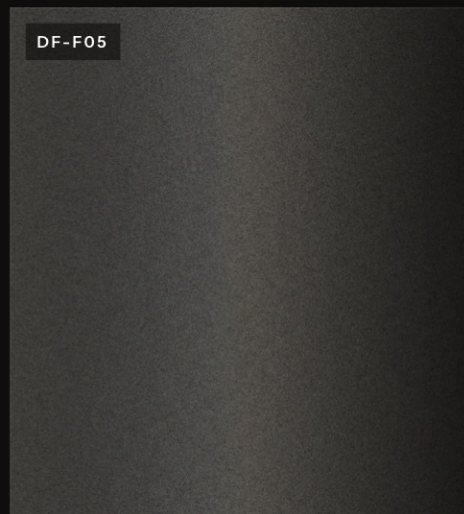

DF-F04

Gunmetal

PVD · taps, accessories

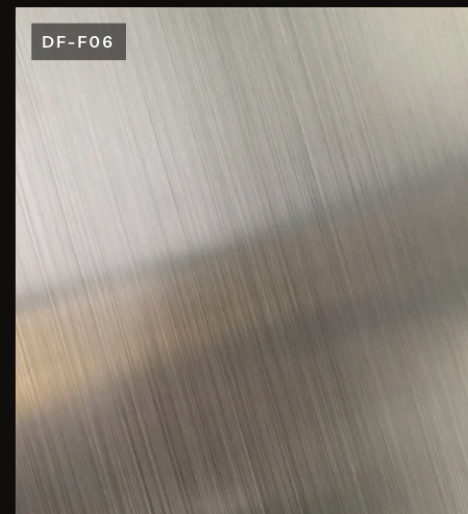

DF-F05

Matt black

Matt · taps, shower screens

DF-F06

Polished chrome

Mirror polish · taps

WOOD, PLASTERS & CERAMICS

The warmth *of* materials

Walnut vanity units, seamless polished-concrete walls, hand-laid zellige, fluted glass for screens: textures that soften stone and metal.

Solid wood

Seamless

Handmade

Extra-clear glass

DF-B01

Walnut

Oiled · vanity units

DF-B02

Smoked oak

Matt varnish · fronts, shelves

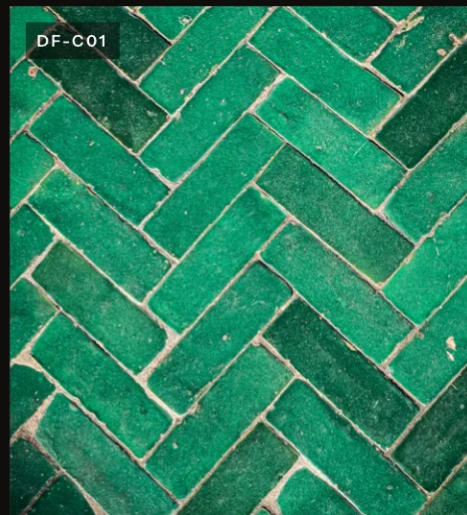

DF-E01

Polished concrete

Seamless · walls, floors, showers

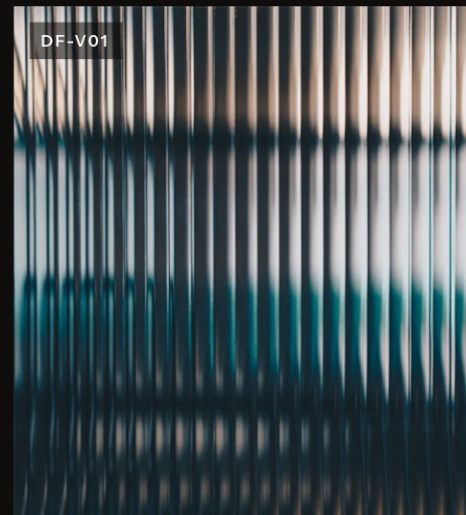

DF-C01

Zellige

Hand-glazed · splashbacks

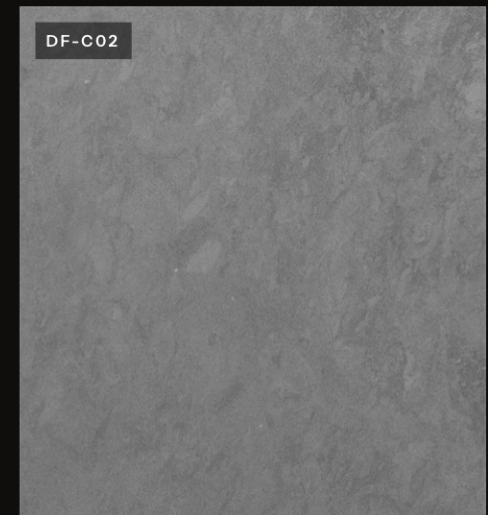

DF-V01

Fluted glass

Extra-clear · screens, doors

DF-C02

Large-format porcelain

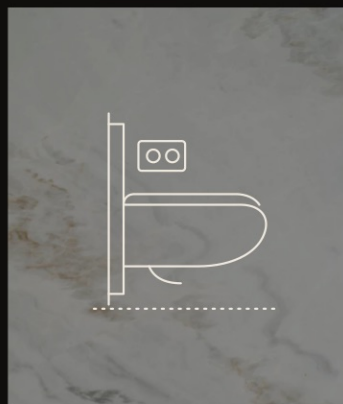

120 × 280 · floors, walls

HIGH-END FITTINGS

The pieces *that make the room*

We select, supply and install fittings from renowned makers, many of them French, and connect every piece to the highest standards.

Illustrative visuals for reference only. Models, finishes and availability depend on the manufacturer.

GLAZED CERAMICS

Coloured ceramic toilets

Wall-hung, floor-standing and Japanese. Sheet 08.

WALL CLADDING

Large-format marble

Floor to ceiling, behind the bath or in the shower.

VANITY TOP

Marble with countertop basins

Wall-hung top cut to measure, with built-in lighting.

FRENCH TAPS

Mixers and shower columns

Made in France, matching finishes.

MADE TO MEASURE

Monolithic basin

Carved from the solid: marble, travertine or backlit onyx.

CENTREPIECE

Freestanding bath

Cast iron, reconstituted stone or solid surface.

WALK-IN SHOWER

Recessed ceiling rain shower

Thermostatic, ceiling or wall-mounted.

COMFORT

Towel rail

Brass, nickel or matt black; electric or connected to the hot water system.

MADE IN FRANCE

The detail *that*
ties the room
together

We install high-end switches and sockets, made in France. Seven collections, with finishes that match the taps and handles in the room.

- FORMATS

40 × 82 to 80 × 320 mm, horizontal or vertical
- CONTROLS

Round push or on-off button; toggle for two-way, push or 3-position
- FUNCTIONS

Sockets, USB, RJ45, HDMI, dimmer, thermostat, reading lights, depending on the collection
- FITTING

On standard 50 mm flush back boxes

Indicative specifications, depending on model.

Stainless steel
Brushed or painted black, visible screws

Anodised aluminium
Five brushed finishes, no visible screws

Watchmaking brass
Thirteen finishes, square or chamfered edges

Guilloché brass
Five goldsmith's patterns

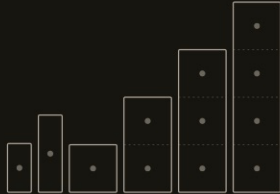

Stepped brass
Lines inspired by the 1930s

Plaster
Painted with the wall, no visible plate

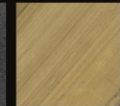

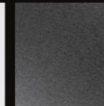

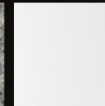

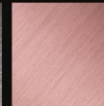

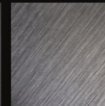

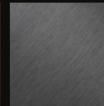

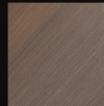

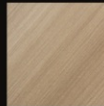

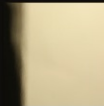

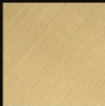

Transparent
PMMA, chamfered edges, visible screws

Six formats
40 × 82 · 40 × 130 · 80 × 80 · 80 × 160 · 80 × 240 · 80 × 320 mm

GLAZED CERAMICS

The toilet, *a piece with character*

We install wall-hung, floor-standing and shower toilets, in white or coloured ceramic. Concealed frame, flush plate and connection, all to the highest standards.

WALL-HUNG On a concealed frame, adjustable height

FLOOR-STANDING Horizontal or vertical outlet

FLUSH PLATE Dual flush, in glass, metal or stone

ELECTRICITY Needed for a shower toilet

Models and colours depend on the manufacturer; shades are indicative.

WALL-HUNG · WHITE CERAMIC

Wall-hung toilet

Rimless, soft-close seat, on a concealed frame.

FLOOR-STANDING · WHITE CERAMIC

Floor-standing toilet

Fitted back to the wall, horizontal or vertical outlet.

SHOWER TOILET

Shower toilet

Washing, drying and a heated seat, from the seat or a remote; a socket is needed.

CONTROL · DUAL FLUSH

Flush plate

Two buttons, in glass, metal or stone, matched to the taps.

WALL-HUNG · MATT BLACK

Coloured ceramic

Matt black, colours or glazes, depending on the model.

WALL-HUNG · VEINED BLACK WALL

Contrast

White ceramic against a dark wall veined with white.

WATER TREATMENT

Soft water, *the invisible luxury*

Limescale dulls taps, clouds shower screens and scales up the water heater. We size the softener to the hardness of your water and your consumption, then install it on the main supply, with a bypass and a blending valve.

- PRINCIPLE** Ion-exchange resin, regenerated with salt
- SETTING** Residual hardness of 8 to 15 °f (French degrees), set with the blending valve
- CONNECTIONS** After the meter and a pre-filter; a drain and a power socket nearby
- MAINTENANCE** Salt tablets to top up, annual check

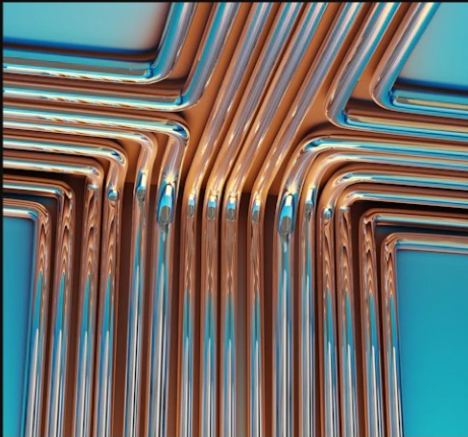

The hardness for each town is published with the tap water tests of the French Ministry of Health. Illustrative visuals and diagrams for reference only.

ION-EXCHANGE RESIN

Water softener

Single cabinet for a utility room, twin-tank for large houses; volumetric valve and sediment pre-filter upstream.

ON THE MAIN SUPPLY

Connection

After the meter, with a bypass to isolate the unit without cutting the water off.

MAINTENANCE

Salt tablets

Topped up in the tank as it is used.

RESULT

Soft water

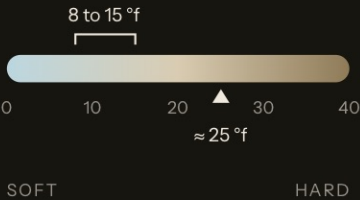

Shining taps, clear shower screens, a protected water heater.

EVERY DAY

At the tap

Fewer marks on dishes and taps.

MEASUREMENT

Water hardness

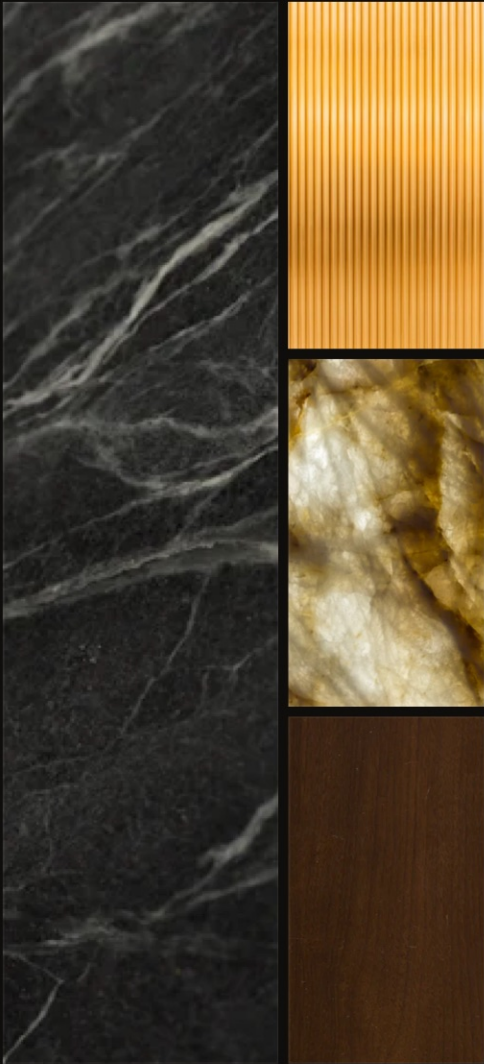

Output set between 8 and 15 °f; above about 25 °f, a softener makes sense.

MATERIAL PAIRINGS

Three moods,
*three colour
schemes*

The same three pairings as our website: a starting point for composing your bathroom, which we refine together during the visit.
